

All Saints Academy Dunstable
Report on Year 13 Examinations 2016

Sponsors and Governors are pleased to announce a significant improvement in students' results in A Level and Vocational courses for the 2016 examinations. With an A Level pass rate of 100% A*-E, and a Vocational pass rate of 100% students have every reason to be proud. The average point score per student has also gone up significantly.

Although there were outstanding grades in many subjects, we are particularly pleased for students who studied BTECs in Sport as **all** students achieved top grades. Special mention must go to Jonathan Wyllie, who achieved an amazing triple Distinction* qualification in Sport.

We are delighted to announce that Chandler Russell is our highest achieving student attaining A*, A and B grades in Maths, Further Maths and Physics respectively and an A in his EPQ. Chandler collected his results and there were a few tense moments while he logged into his UCAS account to confirm that he will be embarking on a maths degree at Southampton. After receiving congratulations from Head of Maths Jeff Bowes, Chandler rushed off to share the good news with his parents.

Business Studies student Lurna Haynes gained two Distinction grades at BTEC with a B and C grade at A level. Not only is Lurna the first member of her family to gain a university place but her grades mean that she has also gained a scholarship for her chosen course at University of Gloucestershire.

The Chair of Governors David Fraser said, 'We are really pleased with our results. So many of our students have worked hard to achieve these excellent grades, which means that more students than ever are leaving All Saints with an excellent preparation for the world of work and further study.'
